EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page 21, line 1 of the abstract, change "is disclosed. In one embodiment, it comprises:" to --has--.

2. The following changes to the drawings have been required by the examiner: Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance. In order to avoid abandonment of the application, applicant must make these above drawing changes.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of the claims is a pilot valve having a rotatable shaft having a slot that gives a varied cross-section as a function of its angular position in combination with a permanent magnet

Art Unit: 3751

affixed to the rotatable shaft and an electromagnet and second magnet that drives the rotatable shaft away from the closed position and a control element placing a dithered PWM current on the electromagnet.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gotzenberger discloses a valve having a rotatable shaft with a slot to vary a cross-sectional area with a permanent magnet. Nakatsukasa discloses a pilot valve with a permanent magnet. Suzuki, Bustamante, Paese, and Fava disclose valves with permanent magnets.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
